- Architected a system for internal APIs, using RabbitMQ for asynchronous task management. Clients receive ID tickets for tracking while the backend efficiently handles web scraping and parsing, ensuring timely user feedback.
- Developed internal APIs to automate some internal processes using Go Fiber, Python Fast API, and MongoDB.
- Created web scraping tools and custom HTML parsers in Python using Playwright and Beautiful Soup.
- Paired with partners to fix critical bugs, ensuring on-time software deliveries and maintaining high quality.
- Developed an automation script in Python for efficient contract signing.
- Developed various administration panels using React (Redux + Saga).
- Optimized project builds for some React web applications, reducing build sizes from 3.46 MB to around 886 KB and in some others even a little bit more.
- I Assisted in improving the quality and speed of Dockerfiles for React and Angular web applications.

CYBER SECURITY ANALYST

- I used the DAST capabilities of OWASP ZAP to automatically review the company's web applications.
- I used SonarQube's SAST capabilities to automatically review the company's code.
- I developed an "economic" DevSecOps pipeline to avoid possible common vulnerabilities.
- I worked closely with the AI team to sanitize requests made by users and avoid SQL injections.
- With some limited resources I Worked closely with IT to implement a good password policy (KeePass).
- I Worked closely with IT to implement backup policies for employee files and repositories.
- I was given an external pentesting report with about 800 vulnerabilities in our projects, and I reduced that number to less than 390 (i.e. fixed about 50% of vulnerabilities) in a span of 4 months.
- I simulated and implemented reverse engineering attacks on some project APKs in order to address, together with the development team, a possible way to mitigate the possibility of a Hacker obtaining useful or critical information about our core business.
- Together with the IT team, I developed a Security Plan based on the ISO/27001 standard.
- I implemented hardening for some of our infrastructure processes.
- I worked alongside the IA team to develop a part of the SOC (Security Operations Center) that can deliver value to our technical and non-technical employees.
