Hiring Team

MERCADO LIBRE — MERCADO PAGO IT

Application for Software Engineer — Infrastructure / AI Systems

Dear Mercado Libre Engineering Team,

I am applying for the **Software Engineer — Infrastructure / AI Systems** position at **Mercado Libre**. I am eager to contribute to the internal infrastructure that powers Mercado Pago's AI and data platforms, focusing on automation, reliability, and cloud scalability.

With over **4 years of professional experience** in software engineering, I've worked across backend, DevOps, and distributed environments using **Typescript**, **Go**, and **Python**. At **Publicis Global Delivery**, I deliver production systems for enterprise clients, leveraging CI/CD, observability, and cloud deployments in both **AWS and Azure**.

At **Grisú** and **Design Systems Inno**, I built asynchronous and event-driven architectures with **Go Fiber**, **FastAPI**, **RabbitMQ**, and **Kafka**, deploying infrastructure through **Terraform** and cloud automation. I also helped the DevOps team at **GameConnect** define Terraform-based multi-environment provisioning (dev, QA, prod) on **Azure**, enabling rapid recovery and ISO-aligned uptime standards.

My skill set also covers **SQL optimization**, observability with Grafana/Dynatrace, and scripting for infrastructure health. This experience directly aligns with Mercado Libre's internal AI infrastructure work — combining data reliability, backend performance, and automated cloud workflows.

I'm passionate about clean architecture, automation, and learning from large-scale engineering systems. I would be thrilled to join Mercado Libre's Infrastructure team to help shape the next generation of intelligent, scalable internal platforms.

Sincerely,

Juan Manuel Young Hoyos
