Summary

Frontend engineer who builds **data-heavy, real-time interfaces** in **React** and **TypeScript** — dashboards and technical UIs that make dense machine output legible to the engineers who depend on it. I own interfaces end to end from prototype to production, build **reusable component foundations** across front ends, and take **frontend performance** seriously (one build cut 3.46 MB to 886 KB). Comfortable across **REST/GraphQL** boundaries and inside unfamiliar backends — I have shipped Python and C++, and I write **Rust** for robotics outside work (**lidar SLAM**, sensor drivers). I review code, write things down, and mentor.

Skills

Frontend	React, TypeScript, JavaScript, Next.js, React Native, Zustand, Redux/Saga, HTML5, CSS3, accessibility
Data-Heavy UIs	Monitoring dashboards, real-time / streaming interfaces, simulation & sensor telemetry (Rerun, lidar), 3D (Godot, Unity)
Performance	Frontend performance (bundle 3.46 MB → 886 KB), build tooling (Vite, Webpack), monitoring (Dynatrace)
APIs & Backends	REST, GraphQL, WebSockets, MQTT, Kafka · unfamiliar backends: Rust, Go, Python, Node.js, C++
Engineering Practice	Code review, RFCs & technical writing, async collaboration, mentoring, testing (Jest, Playwright), CI/CD
Systems & Robotics	Rust (robotics: SLAM, lidar drivers, embedded cross-compilation) · Tailwind CSS, D3.js, Kubernetes (familiar)

Open-Source Projects

Project Olivaw · github.com/Project-Olivaw

CREATOR — ROBOTICS IN RUST

2025 – Present

- Pure-Rust robotics libraries: **olivaw-slam** (2D lidar SLAM — correlative scan matching, keyframing, log-odds **occupancy grid**, no ROS2/C++), **olivaw-lidar** (RPLIDAR driver cross-compiled to **aarch64** hardware, live scans **visualised in Rerun**), and **olivaw-cli**, a **developer tool** vendoring editable Rust **components** from a curated registry.

Experience

Okorum Technologies

TECHNICAL LEAD

Medellín, Colombia (Hybrid)

Dec. 2025 – Present

- Own the **React + TypeScript** front end and the services behind it for a national-scale platform, delivered **ahead of the government mandate deadline**, in one **Turborepo** monorepo with shared types.
- Made the system observable and debuggable under load by standing up **logs, traces and metrics** (Grafana, Loki, LGTM), with Redis caching and fault-tolerant resumable queues.
- Kept multiple surfaces consistent with **shared component foundations**, and drove decisions through **written proposals and design reviews** — **unblocking teammates** ahead of my own work.

Publicis Global Delivery (PGD) — Digitas

FRONTEND DEVELOPER

Colombia (Remote)

Jan. 2025 – Nov. 2025

- Built interfaces for **Unicorn AI**, an internal **AI-agent platform**, making model-driven behaviour understandable and controllable — across its **React/Nuxt.js** front ends and **Python** backend.
- Led Duluth Trading Company's e-commerce redesign in **React (Next.js) + TypeScript**, improving load performance and accessibility, and owned **code review** and CI/CD rollout.

Grisú · ArcDesign

FULL STACK DEVELOPER & CONSULTANT

Colombia / Spain (Remote)

Jul. 2023 – Present

- Designed a **geohash** spatial algorithm and ran **MQTT** device **simulations** in Python, integrating results into a client for **near real-time** display — the same shape as visualising live simulation output.
- Owned interfaces **end to end from prototype to production**, including **3D/real-time rendering** work in **Godot**, and lifted site traffic **150%** with a **React** rebuild.

Design Systems Inno · Aligo · Geta Club Play

FRONTEND & PLATFORM DEVELOPER — EARLIER, QA AUTOMATION & SECURITY

Medellín, Colombia

Feb. 2021 – Jun. 2023

- Built **React** monitoring **dashboards** over internal APIs, cut bundle sizes 3.46 MB → **886 KB** through **frontend performance** work, and wrote browser automation with **Playwright**.
- Refactored a legacy **C++ WebAssembly** application (+45% code quality); strengthened **review culture and tests** with 20+ **desk checks** cutting pull-request volume **25%**, plus **test plans**, a 4-person QA team led, and **mentoring** for 10+ years.

Education

EAFIT University

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Medellín, Colombia

Jan. 2018 – Dec. 2025

- Full scholarship “Ser Pilo Paga” (national merit-based award).
