Summary

Frontend engineer who writes legible, maintainable and **performant React + TypeScript**, and who likes building the **reusable foundations** others work on top of — component libraries, shared tooling and frontend standards across multiple front ends. I run **live production software** for international clients, own interfaces end to end from wireframe to deployment, and measurably improve **usability and performance** (3.46 MB → 886 KB). Comfortable with **REST/GraphQL** and in unfamiliar backends — Go, Python, Node.js, C++, and **Rust** in my own robotics projects.

Skills

Frontend	React, TypeScript, JavaScript, Next.js, Nuxt.js, React Native, state management (Zustand, Redux/Saga), HTML5, CSS3, accessibility
Foundations & Tooling	Reusable component libraries, design systems, frontend infrastructure, bundlers (Vite, Webpack), performance (3.46 MB → 886 KB)
APIs & Backends	REST, GraphQL, WebSockets, MQTT, Kafka · unfamiliar backends: Rust, NestJS, Python, · Docker, AWS, CI/CD
Engineering Practice	Code review, RFCs & technical writing, async collaboration, mentoring, testing (Jest, Playwright), monitoring
Systems & Tooling	Rust (robotics: SLAM, drivers, component-registry CLI) · Tailwind CSS, D3.js, Kubernetes (familiar)

Open-Source Projects

Project Olivaw · github.com/Project-Olivaw

Open source

CREATOR — DEVELOPER TOOLING & ROBOTICS IN RUST

2025 – Present

- **olivaw-cli**, a **developer tool** vendoring editable **components** from a curated registry — a **reusable component library** engineers own rather than depend on — plus **olivaw-slam** (2D lidar SLAM, pure **Rust**) and **olivaw-lidar** (RPLIDAR driver, **Rerun** visualisation).

Experience

Okorum Technologies

Medellín, Colombia (Hybrid)

TECHNICAL LEAD

Dec. 2025 – Present

- Own the **React + TypeScript** front end and the services behind it for a national-scale platform delivered **ahead of the government mandate deadline**, in one **Turborepo** monorepo with shared types and a single CI pipeline.
- Kept **live production software** healthy with **observability** (Grafana, Loki), Redis caching and resumable queues.
- Kept multiple front ends consistent with **shared component and type foundations**, driving decisions through **written proposals and design reviews** — **unblocking teammates** first.

Publicis Global Delivery (PGD) — Digitas / Razorfish

Colombia (Remote)

FRONTEND / REACT NATIVE DEVELOPER

Dec. 2023 – Nov. 2025

- Led Duluth Trading Company's e-commerce redesign in **React (Next.js) + TypeScript**, improving load performance and accessibility, and owned **code review** and CI/CD rollout.
- Shipped features to **Unicorn AI**, an internal **AI-agent platform**, across its **React/Nuxt.js** front ends and **Python** backend.
- Increased in-app engagement **30%** for Wegmans Food Markets with **reusable TypeScript components**, and cut critical bugs **25%** with a Jest testing strategy and Dynatrace monitoring.
- Kept **UX consistent across devices** by pairing with QA on core-logic and UI defects (BrowserStack), integrating **Algolia** search into the product surface, and owning rollout through **GitLab CI/CD**.

Grisú · ArcDesign

Colombia / Spain (Remote)

FRONTEND DEVELOPER & CONSULTANT

Jul. 2023 – Present

- Owned interfaces **end to end from wireframe and prototype to production**, including **UI design**, and lifted site traffic **150%** with a **React** rebuild.
- Built **near real-time** views over **MQTT** device telemetry and **3D rendering** in Godot turning dense machine output into something a person can read.

Design Systems Inno · ArcDesign · Aligo · Geta Club Play

Colombia / Spain

FRONTEND & PLATFORM DEVELOPER — EARLIER, QA AUTOMATION & SECURITY

Feb. 2021 – Jun. 2023

- Built **React** dashboards over internal Go and Python APIs, cut React/Angular bundles 3.46 MB → **886 KB**, improved Docker images to speed up **CI/CD**, and raised TypeScript quality across teams.
- Ran **usability**, functional and stress testing across 7 products and fed findings back into **end-user experience** improvements, capturing 100+ defects.
- Raised standards more broadly: 20+ **desk checks** cutting pull-request volume **25%**, a legacy **C++ WebAssembly** refactor (**+45%** quality), a 4-person team led, **mentoring** for 10+ years.

Education

EAFIT University

Medellín, Colombia

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Jan. 2018 – Dec. 2025

- Full scholarship “Ser Pilo Paga” (national merit-based award).
