Microsoft — Team Xbox

October 11, 2025

FRONT END SOFTWARE ENGINEER (JOB #1891629)

Application for Front End Software Engineer — Xbox

Dear Xbox Hiring Team,

I decided to become a software engineer the same way I learned to love games: **solving puzzles and building things**. As a kid I spent hours in **LEGO Star Wars**, tinkering with how levels fit together and wondering how the game worked under the hood. Years later, when I saw this opening at **Microsoft Xbox**, I applied immediately. I admire Microsoft as a technology leader and Xbox even more because I grew up hosting **Halo 3** LAN parties in my town, playing with a split screen **Call of Duty: Modern Warfare 3** with my friends and beating **Gears of War 2/3** on Insane with my brother. That feeling of shared magic is what I want to help players feel through great **UI/UX** here when in a few months I join the Xbox team.

On the engineering side, I build **cross-platform** experiences with **React.js**, **React Native**, and **TypeScript**, designed for **responsive UX across device form factors** and **multi-input support** (gamepad, touch, mouse/keyboard). At **Publicis Global Delivery**, I shipped React Native features for the **Wegmans** app that lifted engagement by **30%**, reduced critical bugs by **25%** with **Jest+Dynatrace**, and cut release cycles by **50%** via **GitHub Actions** CI/CD. I also led a **Next.js + TypeScript** redesign (Duluth Trading Company), improved performance in **Nuxt.js** apps, and built **GameConnect** UI/UX patterns with multi-input. I'm comfortable integrating **cloud service dependencies** on **Azure**, and I have practical exposure to **C# / C++** from academic and side projects.

I'm fluent in English and Spanish, care deeply about accessibility and inclusive design, and I'm available to work on-site in Colombia or for **remote LATAM** and **open to Costa Rica**. I'd be proud to contribute to Xbox Experiences & Platforms and help the next generation feel the same magic I felt growing up.

Sincerely,

Juan Manuel Young Hoyos
