Microsoft — Team Xbox

October 12, 2025

FRONT END SOFTWARE ENGINEER (JOB #1891629)

Application for Front End Software Engineer — Xbox

Dear Xbox Hiring Team,

I am applying for the Software Engineer II position (Job #1891629) at Xbox because I combine the technical skills you require with genuine passion for gaming experiences. I have **3+ years shipping cross-platform React applications** with **TypeScript**, expertise in **responsive UX across device form factors**, and hands-on experience with **multi-input navigation** (gamepad, touch, mouse/keyboard). Growing up hosting **Halo 3** LAN parties, playing split-screen **Call of Duty: Modern Warfare 3**, and beating **Gears of War 2/3** on Insane with my brother shaped my understanding of what makes gaming experiences compelling—and now I want to help build them at Xbox.

On the engineering side, I build **cross-platform** experiences with **React.js**, **React Native**, and **TypeScript**, designed for **responsive UX across device form factors** and **multi-input support** (gamepad, touch, mouse/keyboard). At **Publicis Global Delivery**, I shipped React Native features for **Wegmans** that lifted engagement by **30%**, reduced critical bugs by **25%** with **Jest+Dynatrace**, and cut release cycles by **50%** via **GitHub Actions CI/CD**. I implemented **asynchronous programming patterns** and **state management (Zustand)** to deliver smooth, responsive experiences. I also led a **Next.js + TypeScript** redesign (Duluth Trading Company), and at **Grisú** I deployed **React apps on Azure** with **cloud service dependencies** and secure deployment pipelines. Through **GameConnect**, I built gaming UI/UX with multi-input navigation patterns. I have practical exposure to **C# / C++** from academic and side projects.

I'm fluent in English and Spanish, care deeply about accessibility and inclusive design, and I'm available to work on-site in Colombia or for **remote LATAM** and **open to Costa Rica**. I'd be proud to contribute to Xbox Experiences & Platforms and help deliver the compelling experiences that define Xbox for the next generation of gamers.

Sincerely,

Juan Manuel Young Hoyos
