Summary

Hands-on senior engineer who sets technical direction beyond a single team. I build **cloud-based, user-facing systems** in **TypeScript**, architect **large-scale distributed platforms** and **shared internal infrastructure**, and turn ambiguous problem spaces into shipped product capability. Currently technical lead on a national-scale platform delivered against a hard regulatory deadline. I work close to **Product and Design**, lead through influence rather than authority, and care about **AI-enabled workflows** and **automation** that remove manual work for users.

Skills

Languages & Web	TypeScript, JavaScript, Python, Go, React, Next.js, Node.js
Cloud & Scale	AWS, Azure, serverless & containerised workloads (Docker), microservices, event-driven architecture, message queues (Kafka, RabbitMQ)
Platform & Architecture	Shared internal APIs & platforms, distributed systems, system design, caching (Redis), MongoDB, performance optimisation
Automation & AI	Design/workflow automation, AI-agent platforms, LLM-assisted engineering (Claude Code), RAG-backed internal tooling
Reliability	Observability (Grafana, Loki, Dynatrace), CI/CD (GitHub Actions, GitLab), automated testing (Jest, Pytest, Selenium)
Ways of Working	Technical direction across teams, architecture & code reviews, mentoring, cross-functional collaboration with Product & Design

Experience

Okorum Technologies	Medellín, Colombia (Hybrid)
TECHNICAL LEAD	Dec. 2025 – Present
- Set the technical direction for a national-scale health interoperability platform and delivered it ahead of the government mandate deadline, architecting a distributed Turborepo monorepo of NestJS microservices that coordinate staged processing over message queues. - Sustained data integrity under an unreliable upstream government API by engineering fault tolerance and resumability into the queue-based system, with a Redis caching layer and MongoDB persistence keeping it fast under multi-provider load. - Enabled reliable production operation on AWS with CI/CD (GitHub Actions) and full-stack observability (Grafana, Loki, LGTM), leading a cross-functional team through design, delivery and architecture reviews.	
Publicis Global Delivery (PGD) — Digitas	Colombia (Remote)
FRONTEND DEVELOPER	Jan. 2025 – Nov. 2025
- Turned manual professional workflows into automated, reusable capability by shipping features to Unicorn AI, an internal AI-agent platform of configurable per-role agents — across its React/Nuxt.js front ends and Python RAG backend. - Improved load performance and delivered responsive, accessible UX by leading Duluth Trading Company's e-commerce redesign in React (Next.js) + TypeScript, owning implementation, code review and CI/CD rollout.	
Grisú	Colombia (Remote)
FULL STACK DEVELOPER & ARCHITECTURE CONSULTANT	Jul. 2023 – Present
- Drove architectural decisions beyond a single team as consulting architect for multiple client organisations (Industrias Falcón, GameConnect), defining system architecture others then built against. - Compressed a 4-month plan into weeks by auditing and accelerating EcoDrive, an event-driven system in React Native, Kafka and Python (FastAPI).	
Design Systems Inno	Medellín, Colombia (Hybrid)
PROBLEM SOLVER — PLATFORM & INTERNAL TOOLING	Dec. 2022 – Jun. 2023
- Built shared internal platform APIs (Go Fiber, Python FastAPI, MongoDB) with a decoupled asynchronous architecture on RabbitMQ, where clients track long-running jobs by ticket ID instead of blocking. - Cut React/Angular bundle sizes from 3.46 MB to 886 KB and sped up CI/CD by improving Docker images across multiple product teams.	
ArcDesign · Aligo · Geta Club Play	Spain / Colombia
EARLIER EXPERIENCE — SECURITY ENGINEERING, QA & MENTORING	Feb. 2021 – Mar. 2025
Reduced known vulnerabilities by 50% in 4 months via DevSecOps pipelines (OWASP ZAP, SonarQube); refactored a legacy C++ WebAssembly application, improving code quality by 45%; led a 4-person QA team and mentored students for 10+ years.	

Education

EAFIT University	Medellín, Colombia
B.S. IN COMPUTER SCIENCE AND ENGINEERING	Jan. 2018 – Dec. 2025
Full scholarship “Ser Pilo Paga” (national merit-based award).
