Summary

Senior engineer building **enterprise-grade cloud services** in **TypeScript** and **NestJS**, with the **React/Next.js** front ends that consume them. I design **microservices** and **RESTful APIs** for **distributed systems**, model both **NoSQL** and **relational** data with caching strategies, and keep services reliable, secure and fast through **automated testing**, **CI/CD** and **observability**. Currently technical lead on a national-scale platform on **AWS**; I mentor engineers, document and present technical decisions, and use **AI-powered development tools (Claude Code)** with strong engineering judgement.

Skills

Cloud Services	TypeScript, NestJS, Node.js, Python, Go · microservices , RESTful APIs , event-driven architecture , distributed systems
AWS & Infra	AWS (CI/CD on AWS , containerised services), Azure , Docker & Docker Compose, GitHub Actions , GitLab CI , GitOps workflows
Frontend	React , Next.js , TypeScript , React Native , Nuxt.js , Redux/Saga , Zustand
Data	NoSQL (MongoDB data modelling), SQL fundamentals, caching strategies (Redis), message queues (SQS-style: RabbitMQ , Kafka)
Security & Quality	Authentication & authorization (OAuth 2.0, OIDC, JWT), unit & integration testing (Jest, Pytest), code reviews , DevSecOps
Operations & AI	Observability & backend performance monitoring (Grafana , Loki , Dynatrace) · Claude Code and LLMs for spec-driven, agentic development

Experience

Okorum Technologies

Medellín, Colombia (Hybrid)

TECHNICAL LEAD

Dec. 2025 – Present

- Delivered an enterprise-scale interoperability platform **ahead of the national mandate deadline** by architecting **cloud services in TypeScript/NestJS** as a **Turborepo monorepo of microservices** coordinating staged processing over **message queues**.
- Kept services reliable and performant under multi-provider load by modelling **MongoDB** persistence, adding a **Redis caching** layer, and engineering **fault tolerance and resumability** so in-flight work recovers when an upstream API degrades.
- Maintained high code quality and production readiness through **automated deployments on AWS (GitHub Actions CI/CD)**, **observability** for logs, traces and metrics (**Grafana**, **Loki**, **LGTM**), and **architecture and code reviews** with a cross-functional team.

Publicis Global Delivery (PGD) — Digitas

Colombia (Remote)

FRONTEND DEVELOPER

Jan. 2025 – Nov. 2025

- Built and shipped features for **Unicorn AI**, an internal **AI-agent platform** used across disciplines — contributing to its **Python** retrieval backend and **React/Nuxt.js** front ends.
- Led Duluth Trading Company's e-commerce redesign in **React (Next.js) + TypeScript**, owning implementation, **code review**, performance tuning and **CI/CD** rollout.

Publicis Global Delivery (PGD) — Razorfish / Wegmans

Colombia (Remote — New York)

REACT NATIVE DEVELOPER

Dec. 2023 – Dec. 2024

- Increased in-app engagement by **30%** for Wegmans Food Markets with production **TypeScript** features, and cut critical bugs **25%** through **unit testing** (Jest) and backend/frontend **performance monitoring** with Dynatrace.
- Reduced release-cycle time by **50%** by automating **CI/CD** pipelines with **GitHub Actions**.

Grisú · Design Systems Inno

Colombia (Remote & Hybrid)

FULL STACK DEVELOPER / PROBLEM SOLVER

Dec. 2022 – Present

- Designed **RESTful internal APIs** (Go Fiber, Python FastAPI, **MongoDB**) with a decoupled **asynchronous** architecture on **RabbitMQ** — clients poll long-running jobs by ticket ID instead of blocking — and cut React/Angular bundles from 3.46 MB to **886 KB**.
- Delivered **NestJS + React** services to **Azure** with secured **CI/CD**, implementing **JWT / OAuth 2.0** authentication for client-facing applications.

ArcDesign · Aligo · Geta Club Play

Spain / Colombia

EARLIER EXPERIENCE — SECURITY ENGINEERING, QA & MENTORING

Feb. 2021 – Mar. 2025

- Reduced known vulnerabilities by **50%** in 4 months via **DevSecOps** pipelines; refactored a legacy **C++ WebAssembly** application (+**45%** code quality); **mentored** engineers and led a 4-person QA team.

Education

EAFIT University

Medellín, Colombia

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Jan. 2018 – Dec. 2025

- Full scholarship “Ser Pilo Paga” (national merit-based award).
