Summary

Frontend engineer who builds **data-heavy, real-time interfaces** in **React** and **TypeScript** — dashboards and technical UIs that make dense machine output legible to the engineers who depend on it. I own interfaces end to end from prototype to production, build **reusable component foundations** across multiple front ends, and take **frontend performance** seriously (one build cut from 3.46 MB to 886 KB). Comfortable across **REST/GraphQL** boundaries and inside unfamiliar backends — I have shipped Go, Python and C++ — and I have worked on **simulation and telemetry** systems (MQTT, Kafka). I review code, write things down, and mentor.

Skills

Frontend	React, TypeScript , JavaScript, Next.js, React Native, Nuxt.js · state management (Zustand, Redux/Saga), HTML5, CSS3, responsive design, accessibility
Data-Heavy UIs	Admin & monitoring dashboards, real-time / streaming data interfaces, simulation and telemetry visualisation, 3D & game engines (Godot, Unity)
Performance	Frontend performance optimisation (bundle 3.46 MB → 886 KB), rendering & build tooling (Vite, Webpack), monitoring (Dynatrace, Grafana)
APIs & Backends	REST , GraphQL, WebSocket-style streaming, MQTT , Kafka, RabbitMQ · comfortable in unfamiliar backends: Go, Python (FastAPI), Node.js/NestJS, C++
Engineering Practice	Code review , technical writing & RFCs, async collaboration, mentoring , testing (Jest, Playwright, Selenium), CI/CD
Familiar	Rust, Tailwind CSS, D3.js, Kubernetes

Experience

Okorum Technologies

Medellín, Colombia (Hybrid)

TECHNICAL LEAD

Dec. 2025 – Present

- Own the **React + TypeScript** front end and the services behind it for a national-scale platform, delivered **ahead of the government mandate deadline** — one **Turborepo** monorepo with shared types keeping UI and backend contracts in sync.
- Made the system observable and debuggable under load by standing up **logs, traces and metrics** (Grafana, Loki, LGTM), with Redis caching and fault-tolerant resumable queues, and led the team through **design and code reviews**.

Publicis Global Delivery (PGD) — Digitas

Colombia (Remote)

FRONTEND DEVELOPER

Jan. 2025 – Nov. 2025

- Built interfaces for **Unicorn AI**, an internal **AI-agent platform** — making model-driven behaviour understandable and controllable for its users — across its **React/Nuxt.js** front ends and **Python** retrieval backend.
- Led Duluth Trading Company's e-commerce redesign in **React (Next.js) + TypeScript**, improving load performance and accessibility, and owned **code review** and CI/CD rollout.

ArcDesign

Spain (Remote)

FULL STACK DEVELOPER (PART-TIME)

Jul. 2023 – Mar. 2025

- Designed a **geohash + hashmap** spatial algorithm and ran **MQTT** device simulations in **Python**, then integrated the result into a client for **near real-time** display — the same shape of problem as visualising live simulation output.

Design Systems Inno

Medellín, Colombia (Hybrid)

FRONTEND & PLATFORM DEVELOPER

Dec. 2022 – Jun. 2023

- Built **React** admin and monitoring **dashboards** (Redux + Saga) over internal APIs, and cut React/Angular bundle sizes from 3.46 MB to **886 KB** through **frontend performance** work.
- Wrote browser automation and parsers with **Playwright**, and improved TypeScript code quality across several React Native apps.

Aligo · Geta Club Play

Colombia

EARLIER EXPERIENCE — QA AUTOMATION, SECURITY & MENTORING

Feb. 2021 – Oct. 2022

- Refactored a legacy **C++ WebAssembly** application (+**45%** code quality), reduced known vulnerabilities **50%** in 4 months via DevSecOps, led a 4-person QA team and **mentored** students for 10+ years.

Education

EAFIT University

Medellín, Colombia

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Jan. 2018 – Dec. 2025

- Full scholarship “Ser Pilo Paga” (national merit-based award).
