Summary

Frontend engineer who writes legible, maintainable and **performant React + TypeScript** code, and who likes building the **reusable foundations** other engineers work on top of — component libraries, shared tooling and frontend standards across multiple front ends. I have run **live production software** for international clients, own interfaces end to end from wireframe to deployment, and measurably improve performance (one build cut from 3.46 MB to 886 KB). Comfortable with **REST/GraphQL** and going into unfamiliar backends — I have shipped Go, Python, Node.js and C++ — and I care about review, mentoring and writing things down.

Skills

Frontend	React, TypeScript, JavaScript, Next.js, Nuxt.js, React Native · state management (Zustand, Redux/Saga), HTML5, CSS3, responsive design, accessibility
Foundations & Tooling	Reusable component libraries & design-system adoption, frontend infrastructure, bundlers (Vite, Webpack), build & performance optimisation (3.46 MB → 886 KB)
APIs	REST, GraphQL, WebSocket-style streaming, MQTT, message queues (Kafka, RabbitMQ)
Beyond the Frontend	Comfortable in unfamiliar backends: Node.js/NestJS, Go (Go Fiber), Python (FastAPI), C++ · Docker, AWS, Azure, CI/CD
Engineering Practice	Code review, RFCs & technical writing, async collaboration, mentoring, testing (Jest, Playwright, Selenium), production monitoring (Dynatrace, Grafana)
Familiar	Rust, Tailwind CSS, D3.js, Kubernetes

Experience

Okorum Technologies

Medellín, Colombia (Hybrid)

TECHNICAL LEAD

Dec. 2025 – Present

- Own the **React + TypeScript** front end and the services behind it for a national-scale platform delivered **ahead of the government mandate deadline**, in one **Turborepo** monorepo where shared types and a single CI pipeline keep contracts honest across front ends.
- Kept **live production software** healthy with **observability** (Grafana, Loki), Redis caching and resumable queues, and led the team through **design and code reviews**.

Publicis Global Delivery (PGD) — Digitas

Colombia (Remote)

FRONTEND DEVELOPER

Jan. 2025 – Nov. 2025

- Led Duluth Trading Company's e-commerce redesign in **React (Next.js) + TypeScript**, improving load performance and delivering responsive, accessible UX, and owned **code review**, performance tuning and CI/CD rollout.
- Shipped features to **Unicorn AI**, an internal **AI-agent platform**, across its **React/Nuxt.js** front ends and **Python** retrieval backend.

Publicis Global Delivery (PGD) — Razorfish / Wegmans

Colombia (Remote — New York)

REACT NATIVE DEVELOPER

Dec. 2023 – Dec. 2024

- Increased in-app engagement by **30%** for Wegmans Food Markets by engineering **reusable TypeScript components** with Zustand state management, and cut critical bugs **25%** with a Jest testing strategy and Dynatrace monitoring.

Design Systems Inno

Medellín, Colombia (Hybrid)

FRONTEND & PLATFORM DEVELOPER

Dec. 2022 – Jun. 2023

- Built **React** dashboards (Redux + Saga) over internal Go and Python APIs, cut React/Angular bundles from 3.46 MB to **886 KB**, and improved Docker images to speed up **CI/CD** for several product teams.
- Raised TypeScript code quality across several React Native apps and wrote browser automation with **Playwright**.

ArcDesign · Aligo · Geta Club Play

Spain / Colombia

EARLIER EXPERIENCE — QA AUTOMATION, SECURITY & MENTORING

Feb. 2021 – Mar. 2025

- Refactored a legacy **C++ WebAssembly** application (+**45%** code quality); reduced known vulnerabilities **50%** in 4 months via DevSecOps; led a 4-person QA team and **mentored** students for 10+ years.

Education

EAFIT University

Medellín, Colombia

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Jan. 2018 – Dec. 2025

- Full scholarship "Ser Pilo Paga" (national merit-based award).
