Summary

Full-stack engineer with 5+ years shipping **customer-facing products** end to end — **React** and **TypeScript** front ends over **REST/GraphQL** APIs and backend services I build myself. I have delivered **B2B2C-style tooling** (internal platforms and partner-facing apps that others use to serve end customers), **mobile-first responsive UIs** for real-world use, and systems handling **complex, time-series and event-driven data**. Strong product sense for translating ambiguous requirements into clean, usable software, with **Docker**/cloud deployment and unit, integration and end-to-end testing.

TECHNICAL LEAD

Dec. 2025 – Present

- Owned a greenfield national-scale platform end to end — **React + TypeScript** front end and **TypeScript** backend services in one **Turborepo** monorepo — and shipped it **ahead of the government mandate deadline**.
- Scaled backend services for high-volume workloads with **Redis** caching, fault-tolerant resumable queues and MongoDB modelling, plus **CI/CD on AWS** and full observability (Grafana, Loki).

FULL STACK DEVELOPER & CONSULTANT

Jul. 2023 – Present

- Worked directly with stakeholders to turn ambiguous requirements into shipped software, delivering **NestJS + React** services to **Azure**, and compressing a 4-month plan into weeks on **EcoDrive** (React Native, **Kafka**, Python FastAPI).
- Designed a **geohash + hashmap** geospatial algorithm and **MQTT** simulations in Python for near real-time device data, deployed React front ends on **AWS**.
