Hiring Team

PERFICIENT

Application for Senior React Native Developer

Dear Perficient Hiring Team,

I am excited to apply for the **Senior React Native Developer** position at Perficient. With over **4 years of experience building and deploying cross-platform mobile applications**, I'm passionate about creating secure, high-performance, and scalable solutions that deliver real business impact.

At **Publicis Global Delivery**, I've led React Native development for enterprise clients such as **Wegmans Food Markets** and **Duluth Trading Company**. My work has included modularizing codebases with **TypeScript**, improving performance via **Dynatrace**, and implementing automated **CI/CD pipelines** for iOS and Android through GitHub Actions — reducing release cycles by 50%.

At my own company, **Grisú**, I've designed and deployed **3+ mobile applications** built with React Native and Flutter, integrated with REST and GraphQL APIs, and backed by secure cloud infrastructure. I've also led projects integrating AI-based services such as **AWS Rekognition** for facial authentication and event-driven features with Kafka and FastAPI.

Perficient's emphasis on **technical leadership, scalability, and innovation** resonates deeply with my own values. I enjoy architecting robust mobile systems, mentoring teams through code quality and CI/CD, and ensuring the applications we deliver are performant, secure, and user-centric.

I'd be thrilled to contribute to Perficient's mission of transforming global enterprises through technology and to grow alongside your talented engineering community.

Sincerely,

Juan Manuel Young Hoyos
