Summary

Senior full stack developer with 4+ years building and maintaining scalable applications end-to-end — **backend services in NestJS, Python and GoLang** plus **React** front ends in **TypeScript**. Strong on **system design, microservices** and the full **SDLC**: I contribute to architectural decisions, enforce quality through **code reviews and automated testing**, and ship on **cloud stacks (AWS, Azure)** with **Docker** and **CI/CD**. Experienced collaborating with cross-functional teams on international projects.

Skills

Backend	GoLang (Go Fiber), Python (FastAPI), Node.js /NestJS, REST APIs , microservices , queues (Kafka, RabbitMQ)
Frontend	React , React Native, Next.js, Nuxt.js, TypeScript , JavaScript, Redux / Saga, Zustand
Cloud & DevOps	AWS, Azure, Docker, CI/CD (GitHub Actions, GitLab), DevOps practices, observability (Grafana, Loki)
Databases	NoSQL : MongoDB, Redis; SQL fundamentals; Algolia search
Practices	System design, SDLC, Agile/Scrum, code reviews, automated testing (Jest, Selenium), technical docs
Languages / Exploring	Spanish (native), English B2+ (daily work with US & EU teams) · Familiar: Kubernetes, Terraform

Experience

Okorum Technologies	<i>Medellín, Colombia (Hybrid)</i>
TECHNICAL LEAD	<i>Dec. 2025 – Present</i>
- Delivered a national health-interoperability platform ahead of the government mandate deadline by driving the system design of a microservices architecture (Turborepo monorepo, NestJS, React) whose stages communicate over message queues. - Delivered features end-to-end by building the React + TypeScript front end in the same Turborepo monorepo as the NestJS services, with shared types keeping frontend/backend contracts in sync. - Kept the platform fast and resilient under multi-provider load with a Redis cache and fault-tolerant, resumable queues that recover from an unreliable upstream API (MongoDB persistence). - Led a cross-functional team across the full SDLC — scoping, architecture, code review, testing, release — backed by CI/CD on AWS (GitHub Actions) and observability (Grafana, Loki).	
Publicis Global Delivery (PGD) - assigned to Digitas	<i>Colombia (Remote)</i>
FRONTEND DEVELOPER	<i>Jan. 2025 – Present</i>
- Improved load performance and delivered responsive UX across desktop / tablet / mobile by leading the redesign of Duluth Trading Company's e-commerce in React (Next.js) + TypeScript. - Ensured code quality on international projects through code reviews, testing and CI/CD rollout, collaborating daily with product managers, designers and engineers. - Shipped features to Unicorn AI, an internal AI-agent platform automating workflows for developers, designers, accountants and lawyers — working across its React/Nuxt.js front ends and Python RAG backend.	
Publicis Global Delivery (PGD) - assigned to Razorfish / Wegmans	<i>Colombia (Remote — New York)</i>
REACT NATIVE DEVELOPER	<i>Dec. 2023 – Dec. 2024</i>
- Increased in-app engagement by 30% for Wegmans Food Markets by shipping production React Native features in TypeScript. - Cut critical bugs 25% via automated testing (Jest) and release time 50% by automating CI/CD with GitHub Actions.	
Grisú	<i>Colombia (Remote)</i>
FULL STACK DEVELOPER (SELF-EMPLOYED)	<i>Jul. 2023 – Present</i>
Built NestJS + React apps on Azure with secured CI/CD for international stakeholders, and compressed a 4-month plan into weeks by accelerating an event-driven system in Kafka and Python (FastAPI).	
Design Systems Inno	<i>Medellín, Colombia (Hybrid)</i>
FULL STACK DEVELOPER / PROBLEM SOLVER	<i>Dec. 2022 – Jun. 2023</i>
- Automated internal processes by designing and building REST APIs in GoLang (Go Fiber) and Python (FastAPI) on MongoDB, using RabbitMQ for a decoupled, async task architecture with ticket-based progress tracking. - Cut React / Angular bundle sizes from 3.46 MB to 886 KB and sped up CI/CD by improving Docker images, while building React admin dashboards.	
ArcDesign · Geta Club Play & Aligo	<i>Spain / Colombia (Remote & On-site)</i>
EARLIER EXPERIENCE — FULL-STACK & DEVSECOPS	<i>Sep. 2021 – Mar. 2025</i>
Built a geohash algorithm in Python and deployed React sites to AWS (ArcDesign); cut vulnerabilities 50% via DevSecOps pipelines (Geta Club Play & Aligo).	

Education

EAFIT University	<i>Medellín, Colombia</i>
B.S. IN COMPUTER SCIENCE AND ENGINEERING	<i>Jan. 2018 – Dec. 2025</i>
Full scholarship “Ser Pilo Paga” (national merit-based award).
