Summary

Backend-focused senior engineer with 5+ years building production software, using **Python** across services, automation and tooling since 2021. I design **RESTful APIs** and **microservices** with **FastAPI** and asynchronous, queue-driven architectures, model **MongoDB** persistence for production workloads, and secure them with **OAuth 2.0 / OIDC / JWT**. Currently leading a national **healthcare interoperability** platform built on **HL7 FHIR R4**. I ship with **Docker**, **Pytest**, **CI/CD** and observability, and use **AI-assisted development** (**Claude Code**, LLMs) to move faster while reviewing and validating every generated line.

Skills

Python & Backend	Python, FastAPI, async/await, RESTful API design, microservices, distributed systems, NestJS/Node.js, Go Fiber
Data & Messaging	MongoDB (production data modelling), Redis caching, RabbitMQ, Kafka, async queue-driven pipelines
Auth & Security	OAuth 2.0, OpenID Connect (OIDC), JWT, identity providers; DevSecOps (OWASP ZAP, SonarQube)
Testing & Quality	Pytest, Jest, Selenium, unit & integration tests, code reviews, debugging & root-cause analysis
Cloud & DevOps	Docker & Docker Compose, AWS, Azure, CI/CD (GitHub Actions, GitLab), observability (Grafana, Loki)
AI-Assisted Development	Claude Code and LLMs for code generation, refactoring, test generation and documentation — reviewing and validating AI-generated code
Healthcare Interop	HL7 FHIR R4, EHR data exchange, national compliance pipelines · Familiar: Beanie ODM, SMART Health Links/Cards

Experience

Okorum Technologies

Medellín, Colombia (Hybrid)

TECHNICAL LEAD

Dec. 2025 – Present

- Delivered a national **healthcare interoperability** platform **ahead of the government mandate deadline** by architecting distributed **microservices** that stream send / validate / convert / generate stages over **message queues** into standards-compliant **HL7 FHIR R4** resources for EHR data exchange.
- Kept the pipeline fast under sustained multi-provider load by modelling **MongoDB** persistence, adding a **Redis** caching layer, and engineering **fault-tolerant, resumable asynchronous queues** that recover from an unreliable upstream government API.
- Led a cross-functional team through **architecture reviews**, **code reviews** and release, and contributed platform **observability** (Grafana, Loki) with **CI/CD** on AWS (GitHub Actions).

Publicis Global Delivery (PGD) — Digitas / Razorfish

Colombia (Remote)

FRONTEND / REACT NATIVE DEVELOPER

Dec. 2023 – Present

- Shipped features to **Unicorn AI**, an internal **AI-agent platform** automating workflows for developers, designers, accountants and lawyers — contributing to its **Python RAG** backend alongside its React / Nuxt.js front ends.
- Cut critical bugs by **25%** with **automated testing** and Dynatrace monitoring, and reduced release-cycle time by **50%** by automating **CI/CD** pipelines with GitHub Actions.

Grisú

Colombia (Remote)

FULL STACK DEVELOPER (SELF-EMPLOYED)

Jul. 2023 – Present

- Compressed a 4-month plan into weeks by auditing and accelerating **EcoDrive**, an **event-driven** system built with **Python (FastAPI)** and **Kafka**.
- Delivered services to **Azure** with secured **CI/CD**, implementing **JWT / OAuth 2.0** authentication for stakeholder-facing applications.

Design Systems Inno

Medellín, Colombia (Hybrid)

BACKEND DEVELOPER / PROBLEM SOLVER

Dec. 2022 – Jun. 2023

- Automated manual internal processes by designing and building production **REST APIs in Python (FastAPI)** and Go (Go Fiber) on **MongoDB**.
- Kept the platform responsive under heavy scraping and parsing workloads by architecting a decoupled, **asynchronous** processing layer on **RabbitMQ**, returning ticket IDs so clients polled long-running jobs instead of blocking.

ArcDesign · Geta Club Play & Aligo

Spain / Colombia (Remote & On-site)

EARLIER EXPERIENCE — PYTHON AUTOMATION & SECURITY ENGINEERING

Sep. 2021 – Mar. 2025

- Wrote **Python** simulation, automation and security tooling, and reduced known vulnerabilities by **50%** in 4 months through **DevSecOps** pipelines (OWASP ZAP, SonarQube).

Education

EAFIT University

Medellín, Colombia

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Jan. 2018 – Dec. 2025

- Full scholarship “Ser Pilo Paga” (national merit-based award).
