Summary

Senior software engineer with 4+ years shipping **full-stack, production** software across **React / React Native / TypeScript** front ends and **Node.js (NestJS) / Python (FastAPI)** back ends. I design production-grade **APIs, event-driven data pipelines and AI-powered features** with **observability, reliability and CI/CD** from day one — owning features end-to-end and thriving with cross-functional teams in fast-paced, ambiguous environments.

Skills

Languages	TypeScript, JavaScript, Python, Node.js, Go
Frontend	React, React Native, Next.js, Nuxt.js, Zustand, Jest, responsive & cross-platform UX
Backend & Data	NestJS / Node.js, Python / FastAPI, Go Fiber, REST APIs, GraphQL, event-driven / message queues (Kafka, RabbitMQ), data pipelines / ETL, MongoDB, Redis
AI	Building AI-agent platforms and LLM-API features into production systems; RAG-backed internal tooling (React + Python)
Cloud & Observability	AWS, Azure, Docker, CI/CD (GitHub Actions, GitLab), Grafana, Loki (LGTM stack), Dynatrace
Familiar / exploring	Vector databases & embeddings; workflow orchestration (n8n, Temporal, Airflow)

Experience

Okorum Technologies	Medellín, Colombia (Hybrid)
TECHNICAL LEAD	Dec. 2025 – Present
- Shipped a nationally-compliant health-interoperability platform ahead of the government mandate deadline by architecting a Turborepo monorepo of NestJS (Node.js) microservices that stream send / validate / convert / generate stages over message queues into HL7 FHIR R4. - Kept the data pipeline fast and resilient under multi-provider load with a Redis cache and fault-tolerant, resumable queues that recover from an unreliable upstream API (MongoDB persistence). - Led a cross-functional engineering team and gave it production visibility via observability (Grafana, Loki) and CI/CD on AWS (GitHub Actions).	
Publicis Global Delivery (PGD) — assigned to Digitas	Colombia (Remote)
FRONTEND DEVELOPER	Jan. 2025 – Present
- Improved load performance and delivered responsive UX across desktop / tablet / mobile by leading the redesign of Duluth Trading Company's e-commerce in Next.js + TypeScript, owning implementation, review and CI/CD rollout. - Automated workflows for developers, designers, accountants and lawyers by shipping features to Unicorn AI, an internal AI-agent platform of custom per-role agents — contributing across its React / Nuxt.js front ends and Python RAG backend.	
Publicis Global Delivery (PGD) — assigned to Razorfish / Wegmans	Colombia (Remote — New York)
REACT NATIVE DEVELOPER	Dec. 2023 – Dec. 2024
- Increased in-app engagement by 30% for Wegmans Food Markets by delivering production React Native features — modular components in TypeScript, Zustand and Algolia. - Cut critical bugs by 25% and reduced regression risk by integrating Dynatrace observability and Jest unit tests. - Reduced release-cycle time by 50% by automating CI/CD for Android / iOS builds with GitHub Actions.	
Grisú	Colombia (Remote)
FULL STACK DEVELOPER (SELF-EMPLOYED)	Jul. 2023 – Present
- Delivered full-stack web apps for stakeholders (incl. public-sector programs in Curaçao) by building with NestJS + React and shipping to Azure with secured CI/CD pipelines. - Compressed a 4-month plan into weeks by auditing and accelerating the EcoDrive project — an event-driven system built with React Native, Kafka and Python FastAPI.	
ArcDesign · Design Systems Inno · Geta Club Play & Aligo	Colombia / Spain (Remote & Hybrid)
EARLIER EXPERIENCE — FULL-STACK, BACKEND & SECURITY	Sep. 2021 – Jun. 2023
- Built internal REST APIs (Go Fiber, Python FastAPI, MongoDB) with RabbitMQ-based async task orchestration, and cut React / Angular bundle sizes from 3.46 MB to 886 KB (Design Systems Inno). - Designed a geohash + hashmap geolocation algorithm and integrated it into React Native for near real-time UX; deployed React sites to AWS / Hosting (ArcDesign). - Reduced known vulnerabilities by 50% in 4 months via DevSecOps pipelines (OWASP ZAP, SonarQube) and Python automation (Geta Club Play & Aligo).	
Education	
EAFIT University	Medellín, Colombia
B.S. IN COMPUTER SCIENCE AND ENGINEERING	Jan. 2018 – Dec. 2025
Full scholarship “Ser Pilo Paga” (national merit-based award for top academic performance).
