Summary

Senior engineer who owns **frontend architecture** for complex, enterprise-scale web applications — component design, **state management** and data-fetching patterns — in **TypeScript** and **React**. 4+ years building modern web apps with deep **frontend fundamentals**: responsive design, accessibility, and **browser performance optimisation** (one build cut from 3.46 MB to 886 KB). I champion **code reviews**, **testing strategies** and **design-system adoption**, back my UIs with **REST/GraphQL** contracts, and contribute **Golang** backend services to deliver features end-to-end.

Skills

Frontend	TypeScript, React, React Native, Next.js, Nuxt.js, state management (Zustand, Redux/Saga), HTML5, CSS3, responsive design, accessibility
Tooling & Testing	Bundlers & build optimisation (Vite , Webpack), Jest , Playwright , Selenium, BrowserStack, CI/CD
APIs	RESTful APIs , GraphQL, API contract design, message queues (Kafka, RabbitMQ)
Backend	Golang (Go Fiber), Node.js/NestJS, Python (FastAPI) · SQL fundamentals, MongoDB, Redis
Infrastructure	Docker & containerised deployments, Kubernetes (familiar), AWS, Azure
Quality & Observability	Code reviews , performance budgets, design systems & component libraries, frontend error tracking and performance monitoring (Dynatrace, Grafana)

Experience

Okorum Technologies	Medellín, Colombia (Hybrid)
TECHNICAL LEAD	Dec. 2025 – Present
- Owned architecture end-to-end on a national-scale platform delivered ahead of the government mandate deadline — the React + TypeScript front end and the TypeScript microservices behind it, in one Turborepo monorepo with shared types and a single CI pipeline. - Kept the system fast and reliable under sustained load with Redis caching, fault-tolerant resumable queues, and full observability for logs, traces and metrics (Grafana, Loki) on AWS CI/CD. - Cut duplicated effort across the team by maintaining shared tooling and developer documentation in the monorepo, and worked with backend engineers on technical specification and system design before each feature was built.	
Publicis Global Delivery (PGD) — Digitas	Colombia (Remote)
FRONTEND DEVELOPER	Jan. 2025 – Nov. 2025
- Improved load performance and delivered responsive, accessible UX across desktop, tablet and mobile by leading Duluth Trading Company's e-commerce redesign in React (Next.js) + TypeScript. - Championed frontend best practice on an enterprise codebase — code review, performance tuning and CI/CD rollout — and shipped features to Unicorn AI, an internal AI-agent platform, across its React front end and Python backend.	
Publicis Global Delivery (PGD) — Razorfish / Wegmans	Colombia (Remote — New York)
REACT NATIVE DEVELOPER	Dec. 2023 – Dec. 2024
- Increased in-app engagement by 30% for Wegmans Food Markets by engineering modular TypeScript components with Zustand state management and Algolia. - Cut critical bugs by 25% with a Jest unit-testing strategy, cross-device verification (BrowserStack) and Dynatrace performance monitoring; reduced release-cycle time 50% via CI/CD (GitHub Actions).	
Grisú · Design Systems Inno	Colombia (Remote & Hybrid)
FULL STACK DEVELOPER / PROBLEM SOLVER	Dec. 2022 – Present
- Cut React/Angular bundle sizes from 3.46 MB to 886 KB through build and browser performance optimisation, and improved Docker images to speed up CI/CD. - Built internal REST APIs in Golang (Go Fiber) and Python (FastAPI) on MongoDB with RabbitMQ async processing, plus React admin dashboards (Redux + Saga) and browser automation with Playwright. - Lifted site traffic 150% by rebuilding a company landing page in React, and raised code maintainability across several teams' React Native codebases in TypeScript while gathering requirements directly from stakeholders.	
ArcDesign · Aligo · Geta Club Play	Spain / Colombia
EARLIER EXPERIENCE — QA AUTOMATION & SECURITY ENGINEERING	Feb. 2021 – Mar. 2025
- Built test automation with Selenium and captured 100+ defects across 7 products; refactored a legacy C++ WebAssembly application (+45% code quality); reduced known vulnerabilities 50% in 4 months via DevSecOps. - Championed review culture with 20+ desk checks that cut pull-request volume 25%, wrote test plans and project documentation, and led a 4-person QA team across 3 products.	

Education

EAFIT University	Medellín, Colombia
B.S. IN COMPUTER SCIENCE AND ENGINEERING	Jan. 2018 – Dec. 2025
Full scholarship “Ser Pilo Paga” (national merit-based award).
