Hiring Team

GLOBANT

Application for Senior Web UI Developer

Dear Globant Hiring Team,

I am excited to apply for the **Senior Web UI Developer** position at Globant. With over **4 years of experience building scalable, high-quality interfaces** using **React, TypeScript**, and modern web technologies, I'm passionate about creating seamless user experiences that align technology with business impact.

At **Publicis Global Delivery**, I have delivered production-grade React Native and Next.js applications for international clients like **Wegmans Food Markets** and **Duluth Trading Company**. My work includes implementing predictable state management (Zustand), writing Jest tests, integrating CI/CD pipelines with GitHub Actions, and improving accessibility and performance across devices.

Before that, at **Design Systems Inno**, I worked across both **React and Angular** environments, optimizing builds, modularizing UI components, and enabling scalable delivery through Docker-based workflows. These experiences have made me fluent in the fundamentals of modern web engineering — HTML5, CSS3, TypeScript — and adaptable across frameworks, including Vue and Angular.

I'm especially drawn to Globant's vision of transforming industries through innovation and design-led technology. I would love to contribute to projects where technical excellence meets creativity and help shape digital experiences that make a difference.

Thank you for your time and consideration. I would be delighted to bring my technical depth, UI craftsmanship, and collaborative mindset to Globant's engineering teams.

Sincerely,

Juan Manuel Young Hoyos
