Summary

Full-stack engineer with 5+ years shipping **customer-facing products** end to end — **React** and **TypeScript** front ends over **REST/GraphQL** APIs and backend services I build myself. I have delivered **B2B2C-style tooling** (internal platforms and partner-facing apps that others use to serve end customers), **mobile-first responsive UIs** for real-world use, and systems handling **complex, time-series and event-driven data**. Strong product sense for translating ambiguous requirements into clean, usable software, with **Docker**/cloud deployment, integration and end-to-end testing.

Skills

Frontend	React, TypeScript , React Native, Next.js, Nuxt.js, Zustand, Redux/Saga · mobile-first responsive UI , accessibility, performance optimization
APIs & Backend	GraphQL, RESTful APIs , Node.js/NestJS, Python (FastAPI), Go (Go Fiber) · microservices , event-driven services
Data & Modelling	Complex data models, time-series & streaming data (Kafka), MongoDB, Redis, SQL fundamentals, geohashing
Cloud & Infra	Docker , Kubernetes (familiar), AWS, Azure, CI/CD (GitHub Actions, GitLab), observability (Grafana, Loki, etc.)
Quality	Unit, integration and end-to-end testing (Jest, Pytest, Playwright, Selenium, BrowserStack), code reviews
Product & AI	Requirements discovery with stakeholders, proposal/quoting and internal sales tooling , AI-agent platforms

Experience

Okorum Technologies

Medellín, Colombia (Hybrid)

TECHNICAL LEAD

Dec. 2025 – Present

- Owned a greenfield national-scale platform end to end — **React + TypeScript** front end and backend services in one **Turborepo** monorepo — shipped **ahead of the government mandate deadline**.
- Scaled backend services for high-volume workloads with **Redis** caching, fault-tolerant resumable queues and MongoDB modelling, plus **CI/CD on AWS** and full observability (Grafana, Loki).
- Kept partner-facing flows working when third parties failed by building resilient **integrations with external government APIs**, working with **cross-functional** product and domain experts to turn ambiguous rules into a technical spec.

Publicis Global Delivery (PGD) — Digitas

Colombia (Remote)

FRONTEND DEVELOPER

Jan. 2025 – Nov. 2025

- Built **partner- and practitioner-facing tooling** by shipping features to **Unicorn AI**, a **SaaS**-style internal platform whose configurable agents automate professional workflows — across its **React** front end and **Python** backend.
- Led Duluth Trading Company's e-commerce redesign in **React (Next.js) + TypeScript**, improving load performance and delivering **responsive, mobile-friendly** UX for a direct-to-consumer sales funnel.

Publicis Global Delivery (PGD) — Razorfish / Wegmans

Colombia (Remote — New York)

REACT NATIVE DEVELOPER

Dec. 2023 – Dec. 2024

- Increased in-app engagement **30%** and improved conversion for Wegmans Food Markets with modular **TypeScript** components in a **mobile-first** app; cut critical bugs **25%** (Jest, **Dynatrace**) and release time **50%** via **CI/CD**.

Grisú · ArcDesign

Colombia / Spain (Remote)

FULL STACK DEVELOPER & CONSULTANT

Jul. 2023 – Present

- Turned ambiguous requirements into shipped software with strong **product sense**, delivering **NestJS + React** services to **Azure** and compressing a 4-month plan into weeks on **EcoDrive (Kafka, Python FastAPI)**.
- Shipped **interactive** tools end to end — **UI design** through implementation — React Native simulators and near real-time views over streaming telemetry, backed by a **geohash** algorithm and **MQTT** simulations in Python.
- Set technical direction **beyond a single team** as consulting architect for client organisations, defining architecture other engineers built against, and lifted site traffic **150%** by rebuilding a customer-facing landing page in **React**.

Design Systems Inno · Aligo · Geta Club Play

Colombia

EARLIER EXPERIENCE — PLATFORM APIs, QA & SECURITY

Feb. 2021 – Jun. 2023

- Built internal **REST APIs** (Go Fiber, Python FastAPI, MongoDB) with **RabbitMQ** async processing and React **data visualization dashboards**; cut bundles 3.46 MB → **886 KB**; cut vulnerabilities **50%** via DevSecOps.
- Covered delivery with **unit, integration and end-to-end tests**, and won **1st place among 52+ teams** at a national hackathon with a **mobile payments** prototype — pricing and **financial** flows under time pressure.
- Sped up **CI/CD** for **containerized** apps by improving **Docker** images, championed review culture with 20+ **desk checks** that cut pull-request volume **25%**, and led a 4-person QA team.

Education

EAFIT University

Medellín, Colombia

B.S. IN COMPUTER SCIENCE AND ENGINEERING

Jan. 2018 – Dec. 2025

- Full scholarship “Ser Pilo Paga” (national merit-based award).
